FRONT-END WEB DESIGNER

ABOUT ME

Born and raised in British Columbia, I'm in search for a career in Web Design and Development. I've been studying at BCIT for over a year now, learning about today's new web technologies, styles and standards. Now am ready to work in a professional environment, preferably with other individuals to work and grow further into the field.

My primary objective is to gain various projects and expand my experience into both front sever-side scripting for web and mobile applications.

Warehouse Supervisor – JYSK

05/2011 - Current

Organizing and tracking inventory

Watching over employees and creating an efficient working system

Keeping other supervisors and managers posted on current work status

Responsible for opening and closing warehouse

Desktop/Laptop Service Technician – Freelance

WORK EXPERIENCE

SOCIAL MEDIA

EDUCATION

Computer and Business Equipment

Primarily focuses on printer setup, maintenance, operations, and desktop networking, troubleshooting, server administration, and wireless communications. Other focuses include practical skills training in troubleshooting/repair, customer service, and terminology. Received a diploma in computer science.

Web Development and Design 1

Introductory into basic and advance HTML5 and CSS3. Also cover's some JavaScript and PHP.

Introduction to JavaScript and jQuery

Understanding client-side scripting including DOM manipulation, event handling, and plugins with jQuery.

Web Development and Design 2

More in-depth into web development including best practices, media queries, creating responsive styles, and understanding JavaScript and jQuery.

UX/UI Development

Aimed to create effective user interfaces by analyzing user experiences, data collection, and research. We work within interdisciplinary teams, with emphasis on collaboration, brainstorming, and continued evolution of an interface concept based on user centered development.

SKILLS
